

The Nursery are excited to be using an online learning journal called Tapestry as a platform to share with you your child's achievements, progress, and success.

Through [Tapestry](#) both practitioners and carers can capture, celebrate and share those moments and milestones of a child's learning and development. This is done by us and you uploading photographs and providing brief descriptions and comments to describe the action and achievement pictured. Through sharing visual memories of the nursery day, not only will you get a better understanding of your child's day and progress but you will be able to sit with them at home and reflect on their week at nursery as you view Tapestry together. Likewise, when experiences from home are uploaded to the platform, this input will help us at The Nursery gain a more holistic knowledge of the individual child and their interests, which we can then use to guide our planning and instruction.
